How Mentoring Works

Welcome ...

Welcome to the Australian Mentor Centre's Online Mentoring Portal. Congratulations on selecting mentoring as a learning and development strategy and choosing to participate in your organisation's mentoring initiative.

For the learner (mentee), mentoring provides you with an opportunity to build competencies while attaining personal and professional career goals. For the experienced individual (mentor), mentoring provides you with the opportunity to further enhance your personal and professional competencies while assisting the development of another. For you both, mentoring provides a dynamic and proactive environment in which you can both achieve a level of growth in an off-line, confidential and focussed relationship.

This online portal guides mentees through the process of assessing mentoring needs, finding a suitable mentor from a dynamic database, and creating a mentoring agreement to commence a new mentoring partnership. For mentors, the portal provides an efficient way to record your mentoring profile which enables you to be selected by a mentee. It also supports the management of the mentoring partnership.
